## [A Note from Bright Health Credentialing and Chicago Health Colleagues:](#)

Dear Provider:

We are excited to get you up and running in Bright Health's network as part of your **Chicago Health Colleagues (CHC)** membership! As a first step, we'll need to get you Credentialed.

The best way to ensure you are Credentialed swiftly and without hassle is to make sure your CAQH information account is current, that you've re-attested in the past 180 days, and that you've listed Bright Health Plan as one of your Authorized Plans.

Please follow these short steps below:

1. Log into your CAQH account and ensure your application is complete, accurate, and current.
2. Re-attest to your application being complete and accurate.
3. Include Bright Health Plan as one of your authorized plans to which CAQH can release your Credentialing information

If these steps are followed, we'll expect to have you through our process and live in our network in 60 days. If your application is incomplete or out-of-date you will receive requests from Aperture, our Credentials Verification Organization (CVO), asking you to follow these steps above. This may delay your network participation by as much as 30-60 days.

For more information about how Bright Health is working with Chicago Health Colleagues and Palos Health, please visit the [Payor Contract Highlights & Resources Page](#) on the **Chicago Health Colleagues** website.

Feel free to contact me if you have any questions or concerns. We're thrilled to have you onboard!

Thanks,

**Teresa Summers** | Bright Health
